

UNIT-e Attendance Suite Attendance Grid

Capita Education Services provides powerful solutions for the tracking of students and an important part of this is attendance monitoring. By seamlessly integrating to the rest of the student record system we enable users to access the most comprehensive range of information.

The UNIT-e Attendance Suite allows you to generate registers either based on your curriculum and resource information or as an ad-hoc event. The Attendance Grid uses the latest internet deployment technology to provide devolved attendance capture, from within the classroom.

Summary of software solution

UNIT-e Attendance Grid enables you to update your attendance data online, via a user-friendly and functionality rich interface. In addition to tools and functionality for adding attendance marks, the solution allows you to manage attendance-related issues such as withdrawn students, staff and room cover, and adding strangers.

Benefits

- Rich user interface designed with customer to be familiar and intuitive
- Devolves data entry, increasing speed and accuracy of information
- Fully integrated with the student record, reducing replication of data
- Attendance manager is deployed by using the web without the need for local installs
