

## UNIT-e Student Records Tracking Solution (SRTS) Columbus

Making your management information available to everyone in your organisation.

### What does it do?

Columbus is an 'out of the box' management information intranet. It provides you with a web-based reporting facility that supplies your staff and managers with the information they need, when and where they need it.

UNIT-e Columbus was built using UNIT-e Internet Builder, a powerful generic web reporting tool that renders data extracted by UNIT-e Report Generator into web pages that can be made available both on your intranet and optionally on the Internet.

UNIT-e Columbus is extensible using UNIT-e Internet Builder. Additional reports written by the organisation can be added to the user reports area.
