

UNIT-e Student Records Tracking Solution (SRTS) Online Day View & Room Booking

This new application is designed for use by management, administration and teaching staff who wish to view activities taking place within the college and also book meeting rooms.

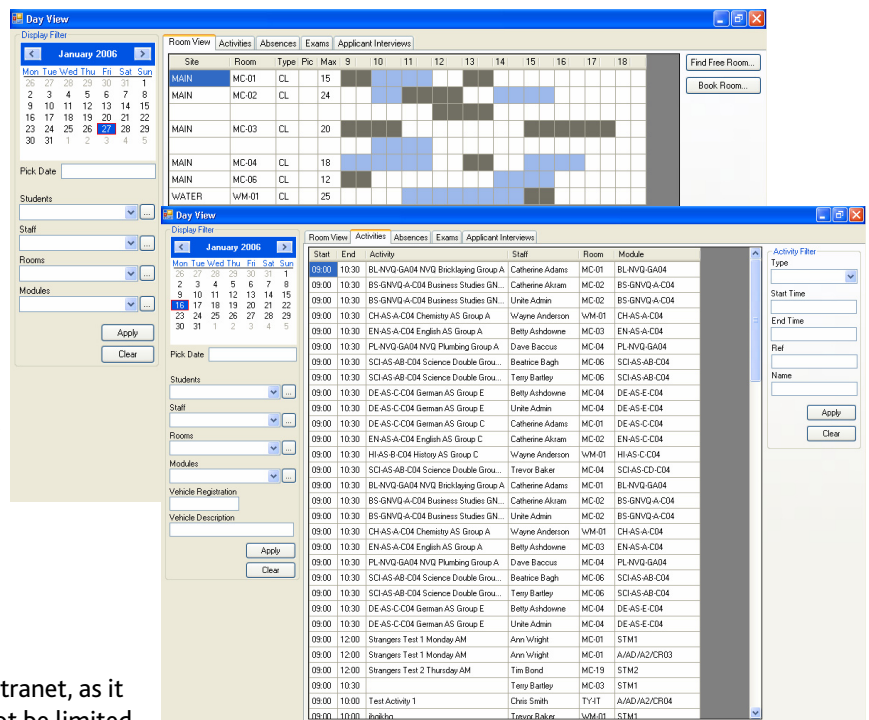

Day View presents the college's timetabled classes, examinations, interviews and other meetings. The initial default view will be 'today' but other dates can be selected from the calendar and it's also possible to apply a filter.

Room Booking functionality enables the user to find an available room and subsequently book rooms for meetings, interviews and other occasions. Please note that it is not intended to be an online timetabling package as it will not include any clash checking functionality. It is intended to be an invaluable resource to support the college Reception and Student Services teams, who along with many other staff may wish to view such MIS data.

This new product replaces and enhances the existing Day View functionality - which currently only exists within UNIT-e Resource Manager and is therefore difficult to deploy widely.

Whilst users may launch this product from their college intranet, as it will be a functionally rich SmartClient application it will not be limited by the constraints of typical browser applications.

Colleges with licenses for UNIT-e Resource Manager Day View will only need to purchase the Room Booking license in order to receive the new Day View license.

Features & Benefits

- Locate staff and students rapidly
- Locate today's exam rooms
- Find free rooms quickly and efficiently and book immediately for a meeting
- Fully integrated with the rest of UNIT-e
- Accessible from any internet ready PC.
