

UNIT-e Student Records Tracking Solution (SRTS) Report Generator

The heart of the UNIT-e solution and the most powerful Management Information Reporting tool available.

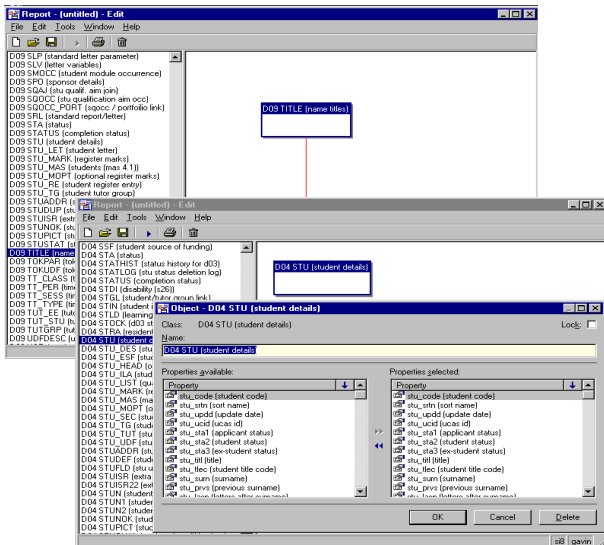

What does it do?

Report Generator offers colleges a unique approach to reporting. No other system comes close to its potential for accessing, interrogating, manipulating and managing vast amounts of business-critical information from multiple sources - all tightly controlled in user-defined environments.

This intelligent application understands the structure of the UNIT-e database and has the ability to create and run complex reports through an intuitive and interactive graphical interface.

Not only is it an extremely powerful reporting tool, but it can also be used to import data into the UNIT-e database in a controlled and secure manner.

Report Generator also provides a powerful global update facility that enables a large number of records to be manipulated and maintained quickly in a single process.

Key Benefits

- **Simple** : an intuitive graphical interface and unique 'drag and drop' reporting tools which understand the structure of the data being stored
- **Flexible**: core reports deliver data for use/formatting in Crystal Reports, Microsoft Office and the web
- **Powerful**: the Report Generator module provides the ability to create and run complex reports.

the total education management solution
