

UNIT-e Dictionary Importer

UNIT-e Dictionary Importer provides users with the ability to add table information from non UNIT-e solutions into UNIT-e Report Generator.

UNIT-e Report Generator offers colleges a unique approach to reporting. No other system comes close to its potential for accessing, interrogating, manipulating and managing vast amounts of business-critical information from multiple sources - all tightly controlled in user-defined environments. UNIT-e Dictionary Importer is an additional module which complements UNIT-e Report Generator, allowing you to use the tool against database tables supplied by third parties or developed by yourself.

Features & benefits

- Extend the power of report generation to all college RDMS systems
- Create dictionaries of other systems; VLEs, accounts, libraries and more
- Add user-created tables and views to your existing MIS UNIT-e dictionary
